

Diane Campbell, Assistant Deputy Minister, Meteorological Service of Canada

Diane Campbell was appointed the Assistant Deputy Minister, Meteorological Service of Canada on August 3, 2019. Previously, she was acting Associate Assistant Deputy Minister for the Meteorological Service of Canada since September 4, 2018.

Ms. Campbell spent the previous 10 years as the Director General of Prediction Services at Canada's Meteorological Service of Canada. She oversaw the delivery of 24/7 weather, air quality, ice and climate services to Canadians including the public, marine, aviation weather forecasts and warnings across Canada. She led several major service transformations within the Meteorological Services of Canada including the development of new client and sector specific services.

Ms. Campbell has worked for over 30 years in the Canadian Public Service. She started her career as a marine biologist conducting toxicological and environmental studies and moved into research management where she held progressively more senior managerial positions overseeing environmental, mineral, metals and earth sciences-related science programs. She served as the National Director of Environmental Assessment at Environment Canada; and then as the Director General of earth science related programs at Natural Resources Canada.

Ms. Campbell has Bachelor of Science degree in Marine Biology from the University of Guelph, Ontario.
